Here's some information about the activities your student did with us. Links at the bottom will help you explore further. Enjoy!

What did we do (content, skills, data collection)?

We practiced existing tricks, performing for each other.

We created a whole-class disappearing act!

We created personalized magic wands (painted & decorated)

We created a simple version of a magic gimmick known as the "Raven".

How did we do it (materials & methods)?

Students practiced their tricks for each other, and helped instruct students who missed specific activities.

Students performed a disappearing act - one by one - using iMovie video editing.

Students created and painted personalized magic wands (dowels, acrylic paints, brushes, palettes).

Students constructed and tested a simple off-the-shelf component "raven" device using a ring, rubber band and badge reel, and tested and practiced and performed.

Where can we find out more?
