

Here's some information about the activities your student did with us. The links at the bottom will help you explore further. Enjoy!

What did we do? (content, skills, data collection)

Introductions, galaxy slime, pinhole projectors.

How did we do it? (materials & methods)

We used a combination of a recipe for fluffy slime and a recipe for galaxy slime to make fluffy galaxy slime.

We made beautiful pinhole projectors to safely view the eclipse by poking holes in paper. We learned how eclipses happen, and then each student received a pair of eclipse glasses.

Where can we find out more?
